VITA**URBANA** (urban life):
TAKE A SEAT ON THE LANDSCAPE

Life is made of encounters, exchanges, open-air activities, urban landscape. An urban space becomes alive with people. Metalco by VITA**URBANA** (urban life) creates new ways to live the landscape, conceiving a collection which embodies the historic concept of a "square." This collection matches a captivating design (Metalco's style in street furniture) with the most sophisticated SMART technologies. Metalco's aim is to provide an alphabet by which everyone may create their own urban vocabulary and may invent new places, new spaces to live the landscape, big planters carrying public seats which join the space, because "every place is home..."
