- 6 accessories
- 8 sample project
- 10 under construction
- 14 trial assembly
- 16 projects

Straight bench with solid wood seat and steel supports. It can be accessorized with a solid wood backrest and by adding more components of different lengths and widths, designed to give freedom to create islands of relaxation. It can also be matched with other steel elements such as planter liners, seats and customized edging to finish off the lower perimeter of the island's base.

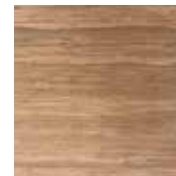

Raw Corten Steel or Corten Steel with "ANTI-WASHOUT" Treatment

To significantly reduce the loss of oxide associated with corten steel, Metalco recommends using a special "ANTI-WASHOUT" treatment. This treatment does not completely block all oxide losses, but will reduce about 95%-99% of the oxide losses associated with the cycle of maturation of corten as it stabilizes.
