

High Performance Concrete (HPC)

HPC is a mixture made of performance reinforced concrete, with the addition of granite or marble aggregates, with good technical structural performance. The aggregates are carefully selected and available in three different colors, white, grey and dark grey and it is provided as a standard, with VELLUTO finish.

Possible surface finishes of HPC products are:

Polished surface and sides

VELLUTO surface and sides

Polished surface and VELLUTO sides

Not all products are available in all finishes. In order to check the finishing available on each product please refer to individual product data sheet for descriptions.

As a standard, the surfaces are treated with a special "Anti-deterioration" treatment, which increases the product's life and resistance characteristics to rain erosion, mold and similar events.

On request, and at an additional cost, an "Anti-graffiti" treatment is available which permits the removal of vandalism carried out with different types of sprays and permanent markers.

Generally, HPC products come equipped with bushings embedded in the stone, suitable for eyebolts to facilitate with the handling and installation.

It is very important to follow the manufacturer's **"Care and Maintenance"** guide to retain your product's warranty. In case of any doubt about the proper maintenance procedure, please contact id created for support.
