

Wood

Not all products are available in all wood species. In order to check the wood available for each product please refer to individual product descriptions or inquire directly.

Oil Treated:

Iroko - Standard Hardwood*

Metalco reserves the right to select wood best suited for the product and/or project based on market availability.

Untreated:

Ipe

Specific to Box Wood, Club, Merenda, Yes only.

Paint Treated:

Robinia/Acacia Glulam
(Acacia Glued Laminated Wood)
Specific to Cortomadere

Okumè

Specific to Moonstone seat, Canape, Sedis, Flo seat, Triangle seat only.

These images are merely indicative; please refer to physical sample.

Vegetable-based Oil

Attention: Wood surfaces treated with oil naturally tend to turn grey in a variable period of time depending on the environmental characteristics of the place of installation of the product. The formation of the grey patina is a physiological reaction and is a self-protection of wood against weathering, while not affecting the quality of the product. It is still possible to reduce the greying of the wood by making a regular renewal of the oiling process (see "Care and Maintenance").

1. Automatic brushing
2. Application of oil with spray gun and brush
3. Storage for air drying
4. Visual quality control

Water-based Paint

Attention: Metalco strongly recommends not to choose painted wood when a regular maintenance is not possible (see "Care and Maintenance") and/or in case of severe atmospheric conditions (saline area, high pollution, steady sun and high temperature exposure, etc.). In such conditions, in fact, paint coat will quickly deteriorate, causing visible peeling.

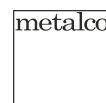

1. Base coat with catalyzed insulation (160 microns) – spray application*
2. Drying (4-6 hours) and automatic brushing*
3. Coat with water-based paint (200 micron) spray application
4. Storage for air drying
5. Visual quality control

*Only on Okumè and Robinia/Acacia

It is very important to follow the manufacturer's "Care and Maintenance" guide to retain your product's warranty. In case of any doubt about the proper maintenance procedure, please contact id created, Inc. for support. Wood is a naturally occurring material that will exhibit variations in color and grain and are not considered defects. Due to hot/cold, dry/wet conditions wood moisture changes may cause cracks and fissures. This is natural.

FSC certification can be realized upon request.

Subject to availability, price surcharge, and extended lead times.
