

Transenna modulare in acciaio costituita da un pannello formato da una cornice in piatto e da tre correnti orizzontali in tondino. I pannelli sono uniti tra loro da un distanziale in acciaio. Disponibili due moduli: terminale (inizio/fine) e composizione.

This modular steel barrier has a plate steel frame with three round bars serving as horizontal crosspieces. Barriers can be joined together with steel spacers. Two different models are available: an end piece (for the start/finish) and a middle section.
